Paper, Towel or Sock — A Ranking of the Most Eco-Friendly Ways to End the Evening Humanity can spend hours discussing eco-friendly cars, waste separation, and the impact of plastic straws on the future of the planet. Meanwhile, there are topics that are discussed far less often — or only in whispers — even though they concern practically every person on Earth. When the romantic part of the evening comes to an end, the internet suddenly becomes surprisingly reluctant to discuss certain subjects. Nobody publishes carbon footprint rankings for towels, toilet paper rarely appears in climate debates, and the topic of socks remains something of an internet legend. And yet the question itself is...	Internal Links	Dofollow
If every porn video planted one tree, the Amazon would grow back by next week The world loves talking about ecology. Technology companies publish climate neutrality reports, celebrities show off bamboo toothbrushes, and major platforms increasingly promote their “green” approach to business. At the same time, there is one part of the internet that is rarely discussed in the context of sustainability — even though it generates enormous traffic every single day. That part is, of course, the porn industry. And although combining ecology with adult streaming still sounds unusual to many people, the issue is not nearly as abstract as it may seem. Modern internet infrastructure — including its most private corners...	Internal Links	Dofollow
ECO-SEXUALITY for beginners: how to love yourself and the planet at the same time Just a dozen years ago, the concept of “eco-sexuality” barely existed in mainstream discussions. If anyone had heard about it at all, it was usually a very small group of people interested in alternative social trends or eco-friendly lifestyles. Today, however, the term appears more and more often in conversations about relationships, sexuality, conscious consumption, and modern approaches to sustainability. It is a relatively new phenomenon that emerged alongside the growing need for more responsible everyday choices. Once people started analyzing the environmental impact of food, clothing, cosmetics, transportation, and technology, similar questions were bound to appear sooner...	Internal Links	Dofollow
Streaming as an intangible service — and its real impact on the environment Streaming has become as natural to us as turning on a light or checking the weather on our phones. We watch series, sports broadcasts, video podcasts, and live streams, often without even thinking about what is actually happening “behind the screen.” Streaming, although intangible — because it does not produce smoke, generate plastic waste, or leave a factory on a truck — is in reality built on an enormous infrastructure of servers, networks, data centers, and information processing systems. That is exactly why environmental responsibility in the IT industry is becoming increasingly important. Increasingly important for us as...	Internal Links	Dofollow

While there's no exact limit to the number of links you should include on a page, best practice is to avoid exceeding 200 links.

Links pass value from one page to another, but the amount of value that can be passed is split between all of the links on a page. This means that adding unnecessary links will dilute the potential value attributed to your other links.

Using the Nofollow attribute prevents value from being passed to the linking page, but it's worth noting that these links are still taken into account when calculating the value that is passed through each link, so Nofollow links can also dilute pagerank.

Broken Links

No broken links were found on this web page

Broken links send users to non-existing web pages. They are bad for your site's usability, reputation and SEO. If you find broken links in the future, take the time to replace or remove each one.
